Benefits for the selected Startups

A common product development and market development between the startup and BG is at the heart of this initiative. Therefore, it is important for BG and UBS that a close collaboration can take place. In this context, the selected startup will benefit from several or all of the following advantages:

- a. Access to BG's teams, as much as necessary for the success of the collaboration
- b. Subject to BG's confidentiality obligations towards its clients, access to BG's unique portfolio of services and customer network in Switzerland, France and all over the world, depending on the target segment and common product development. BG is running up more than 2000 projects in parallel and can offer a first-class springboard for ambitious startups
- c. Objective-driven project or product co-development together with BG teams
- d. Visibility in medias, print or digital
- e. Support from UBS Growth Advisory (equity fund-raising and SEF growth initiative). UBS has supported over 40 Swiss growth companies, by finding the right investors for them or granting them credit financing
- f. Access to funding, either from the UBS Growth Advisory services or from BG, upon proper matching and long-term collaboration perspectives

Upon selection, the selected startup(s) will enter into a collaboration contract with BG. The terms and conditions of this collaboration contract shall provide details about clauses a.-f., depending on joint development expectations and actual needs.
